

ANNEX A for EN 13795-1 or/and EN 13795-2: Raw material

Document to join to the samples (1 separate form per reference)

To perform the quoted tests and to provide the correct information in the final report, we would like to receive the following information:

Offer n°:

Sample identification

Attention: as this information will be used in the test report, no changes are allowed, once the report is issued.

Will be used for (tick your choice(s))

surgical gown (EN 13795-1)

surgical drape (EN 13795-1)

clean air suits (EN 13795-2)

Identification of sides and manufacture direction

clearly mark on the sample or describe below the exterior side
(= side facing the sterile field)

clearly mark on the sample or describe below the manufacturing direction of the fabric

(= weft/cross or chain/machine)

Sterilisation (tick your choice(s))*

Please note that the standard EN 13795-1 requires that all the tests shall be performed on the sterile (if applicable and except for the microbial cleanliness) finished product.

In the event the samples do not comply with this requirement, clearly indicate that they are to be tested non-sterile or that the end-use is unknown, and that you take full responsibility for deviating from it.**

sample can be steam sterilised at 121°C for 15 minutes

sample can be steam sterilised at 134°C for 4 minutes

**to be tested non-sterile

**end use not known

* Some tests require sterilization prior to testing

Important Notice: Samples should be shipped in individual and sealed packages.
