Centexbel Patent Cell

Centexbel Patent Cell

The Centexbel Patent Cell was created in collaboration with the Belgian FPS Economy to support all companies in the entire textile value chain in all matters related to intellectual property rights.

The Centexbel Patent Cell's main purpose is to boost the interest of SMEs in IPR related items, by advising them about how to obtain and use patents and other forms of intellectual property rights and by disseminating updated information on:

- (inter)national policy decisions related to IPR
- fiscal measurements to promote patents
- innovative textile technologies and products from all around the world

PATLIB Privileged Database Access

In 2002, the Centexbel Patent Cell received the statute of PATLIB (Patent Library) centre by the European Patent Office, granting us privileged access to non-public data and highly specialised up-to-date EPO training programmes and refined online search engines.

Services

- Information, publications & hands-on training sessions
- Patent watch
- Patent analysis
- Assistance in writing patent applications
- Freedom To Operate studies
- Prior Art Studies
